Intelligent Cost Reduction

We have developed a problem-solving process which typically saves 30% or more on benefit spend items, improves bottom-line earnings and overall performance of businesses. Typical items we review (Short & Long Term Disability, Life, AD&D, Dental, Property & Casualty, Health and Qualified Plans).

Our savings are derived from a number of exclusive agreements, national discount programs, general agent contracts and access to trust distribution. We are only paid when cost savings are implemented with our programs, methodologies and strategies.

Life Review

Insurance has changed over the last 10 years. Our comprehensive evaluation of your coverage examines your policies to determine if they are the most efficient plans available today. Life constantly changes, get your policy reviewed today.

Retirement Architecture

Our Retirement Architecture Blueprints and Worst Case Scenarios attempt to provide you the financial insight and disaster avoidance planning necessary to fulfill your retirement dreams. And allow you to take those retirement dreams trips you always desired while saving money.
